

CL - Biz - Report 2026.06

Cash Loan (CL) monthly business report • Reporting month: June 2026 • Latest actual: Jun-26 • Forecast month: Jul-26

Data basis. Figures are drawn from the Annual Plan / KPI sheet and the Initiative Tracker (status as of end-June 2026). Structure follows the fixed four-part format; each section is split into Structural ceiling unlocks and Incremental acquisition / retention improvements.

AI-generated. This report was produced automatically by an AI agent (narrative written by an LLM, figures computed deterministically). Review before use.

KPI snapshot — Cash Loan funnel

Metric (Cash Loan)	Unit	May-26	Jun-26	MoM	Jun Plan	vs Plan
Total User Base	000	64	67	+5%	68	On plan
%mom growth user base	%	5%	5%	0pp	5%	On plan
Eligible Base For Cash Loan	000	22	23	+5%	24	On plan
%Eligible/Total User Base	%	35%	35%	0pp	35%	On plan
Traffic to Landing Page	000	7	10	+38%	10	On plan
%Traffic/Eligible	%	32%	42%	+10pp	42%	On plan
Submission	000	1	1	+38%	1	On plan
%Submission/Traffic	%	14%	14%	0pp	14%	On plan
Approved	000	1	1	+38%	1	-8%
%Approval Rate	%	65%	65%	0pp	70%	-5pp
Average Ticket Size	VNDm	110	110	0%	110	On plan
%mom growth ticket size	%	0%	0%	0pp	0%	
Disbursement Volume	VNDm	71,543	98,596	+38%	107,191	-8%

Read: Disbursement Volume reached VNDm 98,596 in June 2026, up 38% MoM but 8% below the VNDm 107,191 plan. The funnel expanded mechanically via a 5% growth in Eligible Base For Cash Loan and a 38% surge in Traffic to Landing Page, while conversion rates remained flat. The primary variance to plan stems from a 5pp shortfall in %Approval Rate, as other levers met or exceeded targets.

Movement check: Eligible Base For Cash Loan +5% — MECHANICAL (base-driven; %Eligible/Total User Base flat). Traffic to Landing Page — REAL (%Traffic/Eligible +10pp). Submission +38% — MECHANICAL (base-driven; %Submission/Traffic flat). Approved +38% — MECHANICAL (base-driven; %Approval Rate flat).

1. Performance Overview and Analysis

Headline. Disbursement Volume grew 38% MoM to VNDm 98,596, driven by a 38% increase in Approved volume, yet missed the VNDm 107,191 plan by 8% due to a 5pp gap in %Approval Rate.

MoM bridge (fact). Disbursement Volume +38% decomposes into Eligible Base For Cash Loan x1.05 (mechanical base growth) and %Traffic/Eligible x1.31 (real lift from #4.0 Add new product that unlock new demand); %Submission/Traffic x1.00 and %Approval Rate x1.00 remained flat. Arithmetic: $1.05 \times 1.31 \times 1.00 \times 1.00 \approx 1.38$, i.e. +38%.

Plan-miss bridge (fact). The -8% miss vs plan is driven entirely by %Approval Rate at 65% vs 70% plan (-5pp), despite #5.0 New score model version allows incremental more Eligible in existing segment &

increasing Approval Rate delivering its promised +10pp lift in May (held through Jun). All other levers (Eligible Base, Traffic, Submission, Ticket Size) are on plan.

Structural ceiling unlocks

- Eligible Base For Cash Loan: +5% MoM (On plan) driven by mechanical base growth; #1.0 Add 1 partner with higher risk appetite realized +10pp in May (held through Jun), while #5.0 New score model version allows incremental more Eligible in existing segment & increasing Approval Rate realized +5pp in May (held through Jun).
- %Approval Rate: Flat 0pp MoM at 65% (vs 70% plan); #5.0 New score model version allows incremental more Eligible in existing segment & increasing Approval Rate realized +10pp in May (held through Jun), leaving a residual 5pp gap unowned.

Incremental acquisition / retention improvements

- Traffic to Landing Page: +38% MoM (On plan) driven by #4.0 Add new product that unlock new demand realizing +10pp in Jun (held through Jun) and #6.0 Discover new traffic channel #1 realizing +2pp in Mar (held through Jun).
- Submission: +38% MoM (On plan) driven mechanically by traffic growth; #8.0 Revamp layout of Landing Page realized +2pp in Feb (held through Jun) and #9.0 Make product offerings more diverse realized +2pp in Mar (held through Jun).
- Average Ticket Size: Flat 0% MoM (On plan); #9.0 Make product offerings more diverse realized +10% in Mar (held through Jun).

Initiative delivery — expected vs realized

#	Initiative	Status	Promised	Realized	Verdict
1.0	Add 1 partner with higher risk appetite	Live	%Eligible/Total User Base +10pp	+10pp in May, held	realized in May (held through Jun)
2.0	Add 1 partner with higher risk appetite	Delay	%Eligible/Total User Base +10pp	—	not due (Delay)
3.0	New modelling allows scoring new segments	On Track	%Eligible/Total User Base +15pp	—	not due (On Track)
4.0	Add new product that unlock new demand	Live	%Traffic/Eligible +10pp	+10pp in Jun, held	realized in Jun (held through Jun)
5.0	New score model version allows incremental more Eligible in existing segment & increasing Approval Rate	Live	%Eligible/Total User Base +5pp; %Approval Rate +10pp	+5pp in May, held; +10pp in May, held	realized in May (held through Jun); realized in May (held through Jun)
6.0	Discover new traffic channel #1	Live	%Traffic/Eligible +2pp	+2pp in Mar, held	realized in Mar (held through Jun)
7.0	Discover new traffic channel #2	Deprioritized	%Traffic/Eligible +2pp	—	not due (Deprioritized)
8.0	Revamp layout of Landing Page	Live	%Submission/Traffic +2pp	+2pp in Feb, held	realized in Feb (held through Jun)
9.0	Make product offerings more diverse	Live	%Submission/Traffic +2pp; Average Ticket size +10%	+2pp in Mar, held; +10% in Mar, held	realized in Mar (held through Jun); realized in

					Mar (held through Jun)
10.0	Personalize offerings per users using big data	Delay	%Submission/Traffic +2pp	—	not due (Delay)
11.0	New redirecting tactics for dropped customers	Deprioritized	%Submission/Traffic +0.5pp	—	not due (Deprioritized)
12.0	Running year-end campaign	Not started	%Traffic/Eligible +5pp	—	not due (Not started)

2. Next Month (July) Run-Rate and Key Initiatives

Run-rate. July disbursement run-rate is VNDm 103,525 (+5% MoM vs June actual), projecting a -23% miss vs the VNDm 134,754 July plan absent new structural unlocks.

Forecast — July funnel

Metric (Cash Loan)	Unit	Jun-26 (actual)	Jul-26 (forecast)	Initiative notes
Total User Base	000	67	70	
% mom growth user base	%	5%	5%	
Eligible Base For Cash Loan	000	23	25	
% Eligible/Total User Base	%	35%	35%	
Traffic to Landing Page	000	10	10	
%Traffic/Eligible	%	42%	42%	
Submission	000	1	1	
%Submission/Traffic	%	14%	14%	
Approved	000	1	1	
% Approval Rate	%	65%	65%	
Average Ticket Size	VNDm	110	110	
% mom growth ticket size	%	0%	0%	
Disbursement Volume	VNDm	98,596	103,525	

Structural ceiling unlocks

- No new structural initiatives scheduled for July; #2.0 Add 1 partner with higher risk appetite delayed to Sep-26 and #3.0 New modelling allows scoring new segments on track for Sep-26.

Incremental acquisition / retention improvements

- No new incremental initiatives scheduled for July; #10.0 Personalize offerings per users using big data delayed to Aug-26 and #12.0 Running year-end campaign not started until Q4/2026.

3. Top Priorities for Next Month (July)

#	Objective / lever	Initiative & owner	Target outcome & why it matters
1	Structural — %Eligible/Total User Base	New modelling allows scoring new segments	Unlock +15pp in %Eligible/Total User Base to

		(Persona 2)	expand the addressable market for Cash Loan, addressing the structural ceiling on Eligible Base For Cash Loan growth.
2	Structural — %Eligible/Total User Base	Add 1 partner with higher risk appetite (Persona 1)	Secure +10pp in %Eligible/Total User Base via partner integration to diversify risk appetite and increase the volume of users eligible for Cash Loan.
3	Incremental — %Traffic/Eligible	Running year-end campaign (Persona 3)	Drive +5pp in %Traffic/Eligible to maximize conversion of the existing eligible base into active applicants, mitigating the current traffic saturation.

4. Progress Toward Annual Plan

Structural ceiling unlocks

Lever	What landed / what's next	Confidence	Status
%Eligible/Total User Base	#1.0 Add 1 partner with higher risk appetite landed +10pp in May (held); #5.0 New score model version allows incremental more Eligible in existing segment & increasing Approval Rate landed +5pp in May (held). Next: #3.0 New modelling allows scoring new segments (Sep-26, +15pp) and #2.0 Add 1 partner with higher risk appetite (Sep-26, +10pp).	High	On track
%Approval Rate	#5.0 New score model version allows incremental more Eligible in existing segment & increasing Approval Rate landed +10pp in May (held). Next: No active initiatives; residual gap requires new remediation.	Medium	Behind

Incremental acquisition / retention improvements

Lever	What landed / what's next	Impact	Status
%Traffic/Eligible	#4.0 Add new product that unlock new demand landed +10pp in Jun (held); #6.0 Discover new traffic channel #1 landed +2pp in Mar (held). Next: #12.0 Running year-end campaign (Q4/2026, +5pp).	+12pp realized	On track
%Submission/Traffic	#8.0 Revamp layout of Landing Page landed +2pp in Feb (held); #9.0 Make	+4pp realized	On track

	product offerings more diverse landed +2pp in Mar (held). Next: #10.0 Personalize offerings per users using big data (Aug-26, +2pp).		
Average Ticket Size	#9.0 Make product offerings more diverse landed +10% in Mar (held). Next: No active initiatives.	+10% realized	On track

YTD vs plan and FY outlook

YTD Disbursement stands at VNDm 277,174 vs VNDm 339,865 plan (-18%); FY plan is VNDm 1,879,405. Hitting FY requires closing the %Approval Rate gap immediately and accelerating the Sep-26 structural initiatives (#2.0 and #3.0) to compensate for the Q2 shortfall.

Escalations — high-impact initiatives delayed / deprioritized

Initiative	Owner	Status	Impact	New timing	Note
Add 1 partner with higher risk appetite	Persona 1	Delay	%Eligible/Total User Base +10pp	Sep-26	Partner agreed to phased rollout; Phase 1 (1M users) target delayed by 2 weeks from original Aug 31 plan due to dev re-estimation, now targeting late September.
Discover new traffic channel #2	Persona 3	Deprioritized	%Traffic/Eligible +2pp	Q4-2026	Deprioritized due to Cashier team resource constraints and performance test instability; rescheduled to Q4 2026.
Personalize offerings per users using big data	Persona 2	Delay	%Submission/Traffic +2pp	Aug-26	Kickoff delayed to end of June due to Data Science team prioritizing model optimization; estimated 2 months duration to complete.
New redirecting tactics for dropped customers	Persona 3	Deprioritized	%Submission/Traffic +0.5pp	Q4-2026	Deprioritized due to low expected impact; may be revisited in Q4 2026.

Plan gaps without an active remediation initiative

- %Approval Rate: 65% vs 70% plan (-5pp) — linked initiative #5.0 New score model version allows incremental more Eligible in existing segment & increasing Approval Rate already Live/Done but the residual gap is not closed; no active initiative is in the pipeline to close it — a remediation initiative / owner is needed.

Risks, dependencies & escalations

- %Approval Rate: 65% vs 70% plan (-5pp); #5.0 New score model version allows incremental more Eligible in existing segment & increasing Approval Rate delivered its promise, but the residual gap is unowned with no active remediation initiative assigned.
- #2.0 Add 1 partner with higher risk appetite: Delayed from Aug-26 to Sep-26 due to dev re-estimation, risking Q3 Eligible Base targets.
- #10.0 Personalize offerings per users using big data: Delayed to Aug-26 due to Data Science prioritization, pushing Q3 submission rate improvements.
- #12.0 Running year-end campaign: Not started with creative and budget unconfirmed, creating uncertainty for Q4 traffic volume.
